EDUCATION

University of Massachusetts Amherst

M.S. in Computer Science

Amherst, MA

Dec 2026

University of Massachusetts Amherst

B.S. in Computer Science, Minor in Mathematics; GPA: 3.96; Honors College; Dean's List

Amherst, MA

Dec 2025

Honors Project: Evaluating Deep Learning Models for Facial Expression Recognition in Mental Health Care

TECHNICAL SKILLS

Languages: Java, Python, C, C#, Typescript, HTML/CSS/JavaScript

Frameworks and Technologies: React.js, Node.js, Next.js, Tailwind CSS, Firebase

Libraries: TensorFlow, NumPy, Pandas, Matplotlib, PyTorch, Scikit-Learn

Developer Tools: Terraform, GCP, Datadog, Git, VS Code, JUnit

EXPERIENCE

Symbotic

SWE Co-op

- Incoming Spring 2026 Co-op

Wilmington, MA

Jan 2025 – May 2025

UKG

SWE Intern

- Scaled a distributed observability platform using Terraform by expanding IaC modules and alerting rules, increasing monitoring coverage of critical microservices by 65% and reducing incident detection latency.
- Deployed global GCP ELB configurations to rebalance multi-region traffic during failover events, improving service availability and cutting cross-region failover time by 30%.
- Built a DNS-based tenant routing system that dynamically maps users to isolated pods based on company attributes, improving multi-tenant performance and reducing misrouted traffic by 40%.

Lowell, MA

May 2025 – Aug 2025

Microsoft

AI Studio Project

- Developed and fine-tuned ML models using text classification and LLMs to efficiently categorize news headlines and content descriptions with over 97% accuracy.
- Engineered a custom Copilot Agent integrating summarization, classification, and RAG-style workflows, enabling automated content triage and reducing manual review time by 80%.

Remote (Redmond, Washington)

Sept 2024 – Dec 2024

UMass IT Salesforce

Salesforce Intern

- Resolved 300+ staff/faculty tickets by diagnosing backend automation failures, access-control issues, and data pipeline inconsistencies, improving overall system reliability.
- Built 7+ forms on FormAssembly with Salesforce integration for multiple departments, streamlining data collection processes.
- Wrote custom APEX script to import data from Boomi REST Service and SQL Database into Salesforce, eliminating 100% of email backups inside Salesforce, reducing Salesforce data storage consumption by over 80%.

Amherst, MA

May 2024 – Present

PROJECTS

Deep Q-Learning Agent for Atari Games | *PyTorch*

- Implemented a Deep Q-Network (DQN) agent from scratch in PyTorch to play Atari games, replicating DeepMind's seminal reinforcement learning research.
- Engineered experience replay memory and target network stabilization techniques to improve training stability and performance.

Cavemanomics | *ReactJS, NextJS, ExpressJS, PostgreSQL, Supabase*

- Engineered a full-stack bartering application featuring user-generated content, a real-time swipeable feed, and push notifications.
- Built an integrated communication channel within the app to facilitate user interaction post-match, ensuring a secure and coordinated trade completion.
