EDUCATION

University of Massachusetts Amherst

Amherst, MA

B.S. in Computer Science, Minor in Mathematics; GPA: 3.964; Honors College; Dean's List Sept 2023 – Dec 2025

Honors Project Title: Evaluating Deep Learning Models for Facial Expression Recognition in Mental Health Care

TECHNICAL SKILLS

Languages: Java, Python, C, C#, Typescript, HTML/CSS/JavaScript

Frameworks and Technologies: React.js, Node.js, Next.js, Tailwind CSS, Firebase

Libraries: TensorFlow, NumPy, Pandas, Matplotlib, PyTorch, Scikit-Learn

Developer Tools: Terraform, Datadog, Git, VS Code

EXPERIENCE

UKG

Lowell, MA

SWE Intern

May 2025 – Aug 2025

- Incoming SWE intern for Summer 2025

Microsoft

Remote (Redmond, Washington)

AI Studio Project

Sept 2024 – Dec 2024

- Developed and fine-tuned ML models using text classification and LLMs to efficiently categorize news headlines and content descriptions with over 97% accuracy
- Engineered the Microsoft Copilot app to create a custom agent for news summarization and classification

UMass IT Salesforce

Amherst, MA

Salesforce Intern

May 2024 – Present

- Maintained the contacts database by cleaning up duplicates, enhancing data integrity
- Resolved 300+ online support tickets from staff and faculty, delivering timely solutions
- Built 7 forms on FormAssembly with Salesforce integration for multiple departments, streamlining data collection processes
- Wrote custom APEX script to import data from Boomi REST Service and SQL Database into Salesforce

UMass IT ESD

Amherst, MA

Enterprise Applications Support Intern

Feb 2024 – May 2024

- Enhanced SPIRE site reliability by performing rigorous manual testing of over 140 features after new patch releases
- Contributed to the IT KnowledgeBase with over 20 articles containing detailed documentation and clearer support for SPIRE services
- Reviewed and updated over 200 existing IT support articles
- Created over 7 instructional videos using Camtasia and Audacity to support user training and improve knowledge dissemination

PROJECTS

Witchistry | C#, Unity

- Collaborated with a group of 4 on a chemistry-based 3D game where players forage a forested terrain for different plants and play basic mini games such as identifying functional groups
- Designed character animations and NPCs using ConvAI
- Built an AI guide agent that supports the player around the map

Squaredle Player | Python, Selenium, BeautifulSoup

- Built an automated solver for the Squaredle game
- Used BeautifulSoup to scrape the game and Selenium to directly interact with the game's interface with no user interference

My Pantry Tracker | React.js, Next.js, Firebase

- Developed a full-stack inventory management application designed to help users efficiently track and manage pantry items
